Summary:

Aspiring software engineer and motivated B.Tech Computer Science student with solid skills in Python and Java. Proficient in English with excellent communication and leadership abilities. A proactive learner passionate about event management, team coordination, and creative problem-solving.

Education :

- [B.Tech – Computer Science & Engineering, IES College of Technology (RGPV) — CGPA: 8.0
Expected Graduation 2027
- 12th- Science - 72% | 10th CBSE – 83.6% (Best 5 Subjects)

Technical Skills :

- **Languages:** Java, Python
- **Web Technologies:** HTML , CSS , JavaScript
- **Frameworks:** FastAPI , Angular
- **Libraries** :- Pandas , Numpy. Matplotlib
- **Databases:** MySQL
- **Tools:** Git, GitHub, VS Code, PyCharm,, Eclipse , PostMan
- **Concepts:** OOPS, DBMS, Data Structure & Algorithm

Projects :

1. 🏠 Hommies – Rental Accommodation Platform

Developed a web-based rental accommodation platform that helps users find suitable rooms, hostels, and rental properties based on their preferences and location. The platform allows property owners to post listings and tenants to search, filter, and contact owners seamlessly. Implemented user authentication, property management, advanced search functionality, and responsive design to enhance user experience.

Technologies Used: Angular, FastAPI, Python, MySQL, HTML, CSS, JavaScript

2. 🌾 Kisan Market (Farm-to-Consumer Platform)

Developed a full-stack web application that connects farmers directly with consumers, eliminating intermediaries and ensuring fair pricing. The platform enables farmers to list agricultural products, manage inventory, and receive orders, while customers can browse products, place orders, and track purchases. Implemented secure user authentication, product management, order processing, and responsive user interfaces using Angular, FastAPI, and MySQL.

Technologies Used: Angular, FastAPI, Python, MySQL, HTML, CSS, JavaScript

Certifications :

- **NPTEL** - Programming in Java–(54%)
- **Deloitte** - Technology Job Simulation

Leadership & Co-Curricular Activities :

- **Team Lead**, Major Project (Carrier Guidance and Advisor): Spearheaded a team of 6 developers, delegating tasks based on individual strengths and conducting weekly code reviews to ensure timely delivery.
- **Captain – IES College Cricket Team**
Led the college cricket team in inter-college tournaments, managed team strategy, coordination, and match preparation.
- **Club Cricket Player**
Represented a local cricket club, participating in competitive league matches and improving team performance through consistent contribution.
- **Inter-University Cricket Player**
Played at inter-university level, showcasing teamwork, discipline, and performance under competitive environments.

Industry Exposure & Professional Mentorship :

Worked closely with an experienced IT professional to gain practical exposure to software development workflows, project management, and modern web technologies. Assisted in understanding requirements, debugging applications, API testing, database operations, and version control practices. Gained hands-on experience with Angular, FastAPI, MySQL, Git, and software development best practices while contributing to discussions on real-world projects and problem-solving approaches.

Key Learnings:

- Web application development lifecycle
- REST API design and testing using Postman
- Database management with MySQL
- Version control using Git and GitHub
- Team collaboration and software engineering practices
- Debugging and problem-solving techniques

Soft Skills :

- Proficient in **English** (spoken & written) | Effective team player | Public **speaking & anchoring**
- **Leadership** & group coordination | **Adaptable** & proactive
- Teamwork – Strong ability to collaborate, support teammates, and work towards shared goals effectively.
